Software Developer

E. martinatenani@gmail.com

P. +39 342 0763 819

A. Ferrara, Italy

L. [linkedin.com/in/martina-tenani-70aa30223/](https://www.linkedin.com/in/martina-tenani-70aa30223/)

Aspiring Technical Artist and Gameplay Programmer focused on building efficient, scalable and artist-friendly pipelines, while contributing to engaging player experiences.

Familiar with **Unreal Engine, Unity, C++, and C#**, with foundational knowledge of Blender and a strong interest in both visual and gameplay systems.

Passionate about bridging the gap between art and code through tool development, real-time workflows, and interactive design.

Eager to grow in a collaborative team environment and contribute to high-quality, visually compelling games.

EXPERIENCE

Junior Analyst - Web developer and data automation

Jun 2023 – Current

CLAL, Modena

- Automated the retrieval and processing of agricultural market data using Python scripts.
- Managed and maintained a MySQL relational database to store and organize incoming datasets.
- Supported senior analysts by extracting, cleaning, and analyzing data to identify trends and insights.
- Developed backend logic with PHP to structure data for public-facing web tools.
- Created interactive data visualizations using JavaScript and the ECharts (E3) library for the company website.

Junior Front-End Web Developer

Jun 2020 – Jun 2021

CLAL, Modena

- Developed backend logic with PHP to structure data for public-facing web tools.
- Created interactive data visualizations using JavaScript and the D3.js library for the company website.

EDUCATION

AIV - Game Programming

Oct 2024 – Current

Accademia Italiana di Videogiochi, Rome

Refined programming skills with a focus on Gameplay Programming.

Gained a broad understanding of the game industry and its production goals.

Developed strong teamwork and milestone-driven development practices.

Bachelors of Science in Computer Science

Oct 2019 – Oct 2023

University of Ferrara

Thesis focused on developing a Virtual Reality training environment in Unity (Oculus Quest 2) for the "Hannes" myoelectric prosthesis. Designed to both train users in prosthesis control and provide data to improve the AI model behind its movement. Developed in collaboration with IIT Genoa and IIT Ferrara (ref. PR19-PAS-P1).

SKILLS

- Game Engines** (Unreal Engine, Unity)
- Programming languages** (C#, C++, C, Python)
- 3D modelling basics** (Blender)
- Shaders** (OpenGL)
- Version Control** (Git)
- Problem-Solving** | **Teamwork** | **English Language** (Advanced) | **Leveraging AI Tools**
